## Boris Spieker

I met Nick while I was working as a senior project manager and executive partner of the Business Performance Academy. We ran organizational and leadership training for leading companies in Germany. Although I was very successful in the area of work I was doing. I wanted to work within a more international arena and I felt the need to increase my confidence and expertise in the area of international communication and intercultural understanding.

I met Nick at an intercultural seminar he was running. He radiated trust and confidence in the way he ran the seminar and I immediately felt he would be the person to help me.

As a result of Nick's help I went on to master the challenge of running international leadership programs with both European and Japanese participants. My confidence in perceiving intercultural differences and being sensitive to find good solutions has grown enormously.

I have now moved on and I am happy and successfully working as a principal in an international SAP consulting company and I am conducting international rollouts for Multinational Companies.
